Embracing Themes and Visual Styles

Themes and visual styles provide a simple yet powerful way to change the overall look and feel of your desktop. With a few clicks, you can transform your Windows experience with a new color palette, window borders, and taskbar design. From sleek and

minimalist to vibrant and playful, there's a theme to suit every taste.

To apply a theme, simply navigate to the Personalization settings in Control Panel or right-click on the desktop and select Personalize. Browse through the available themes and choose the one that resonates with you. Your desktop will instantly be adorned with your chosen theme, giving it a fresh and cohesive look.

Changing the Desktop Background

Your desktop background serves as a visual backdrop for your icons, widgets, and applications. Whether you prefer a scenic landscape, an abstract artwork, or a cherished personal photo, Windows allows you to set any image as your desktop wallpaper.

To change your desktop background, right-click on the desktop and select Personalize. Navigate to the Background tab and choose an image from the provided collection or browse your own computer for a

custom image. You can also choose how the image is displayed, whether it's centered, tiled, or stretched to fit the screen.

Customizing Icons

Icons are small graphical representations of files, folders, and applications. While Windows provides default icons for common items, you can customize these icons to add a personal touch to your desktop.

To change an icon, simply right-click on the file or folder and select Properties. Navigate to the Customize tab and click on the Change Icon button. A window will pop up displaying a collection of available icons. Select the one you prefer and click OK. The icon will be immediately updated on your desktop.
