In the aftermath of the cataclysm, Lenie Clarke, the notorious rifter and avenger, vanished without a trace. Her sudden and enigmatic disappearance sparked a torrent of speculation and theories, leaving the world in a state of uncertainty.

Some whispered that Clarke, haunted by the devastation she had wrought, retreated into the depths of the ocean, seeking solace and redemption. Others believed that she succumbed to the malevolent forces unleashed by Behemoth, becoming a victim of her own quest for vengeance.

As time passed, Clarke's disappearance transformed her into a mythical figure, a symbol of both destruction and hope. Her name became synonymous with the chaotic and uncertain times that followed Maelstrom.
